PROFILE

I compose original music and design sound for games and films, working across ambient scoring, interactive audio, music production, and 5.1 composition. My practice combines technical listening with narrative thinking: texture, rhythm, space, and the emotional role of sound in a scene.

SELECTED WORK

STUDENT GAME / 2026 Uni-Verse Music composition and sound effects for a Kingston University game project, shaped around atmosphere and mechanics.	8-BIT COURSEWORK / 2026 Gimmick! Reimagining An original chiptune study using synthesis, sampling, and sequencing techniques.
ORIGINAL SCORE / 2026 Climate Change Awareness Film Original music for a short awareness film produced by a fellow filmmaking student.	SPATIAL AUDIO / 2026 5.1 Surround Sound Composition An original piece composed and mixed in 5.1 surround sound.
MIX & MASTER / 2026 Analog Mastering - Visconti Studio A track mixed on analogue studio equipment and recorded to tape.	

PRACTICE & SKILLS

Composition	Original composition, arrangement, music production, ambient scoring
Sound	Sound design for games and films, mixing, 5.1 composition, audio post-production
Tools & instruments	Ableton, analogue synthesisers, guitar, bass, piano

EDUCATION

Kingston University London | BA (Hons) Music Technology | Expected 2027

Relevant study includes synthesis, sampling and sequencing; sonic environments; analogue and digital production; 1/4-inch tape mastering; audio post-production; Foley; ADR; sound design for film, TV, and games; and advanced mixing and mastering.
